

Japan Analytical Instruments Manufacturers' Association (JAIMA) is a nationwide organization that was founded with the purpose of contributing to the advancement of science and technology by improving technologies related to analytical instruments and promoting the progress of the analytical-instruments industry, thereby contributing to the Japanese economy and the livelihood of its citizens. Most important operation of our association is the exhibition named "JASIS", and it is held for 3 days in the beginning of September in Japan. This is the joint exhibition with Japan Scientific Instruments Association, and is the largest analytical and scientific instruments show in Asia with the most advanced technology and information. The activities of JAIMA and outline of JASIS will be introduced in the session.
